Welcome to our Mathematics Classroom!

I am Raynette Sanquilly and this is my 4th year at AACT and I am so very happy to have you in my class!

Here are the things you need to know to be ready for our class:

We will be meeting in the Compass (the Library) and not my normal classroom

Our class will use Microsoft Teams for all notes and assignments

What do you need for class:

- Notebook (I like composition notebooks) and pencil
- Earbuds with a microphone
- If you have a device (laptop, tablet, phone), bring it! And be sure to bring something to charge it, too!
- Patience with me, your other teachers and other students as we are all learning together

In-Class Days Look Like:

- Discussion and labs
- Small group break-out sessions via video conference
- Practice time

Digital Class Days Look Like:

- Watching Lectures and answering questions
- Posting to discussion boards on TEAMS
- Completing online assignments

100 percent Digital Class Looks Like:

- Watching lectures and answering questions
- Posting to discussion boards on TEAMS
- Completing online assignments
- Meeting weekly with me and other students via video conference

We are all learning together this year and as our needs change, our class will change as well. We are all in this together and have to take care of each other.
